*“Teaching Economics Through Musical Theatre”*

## **Discussion Questions for “Spoonful of Sugar”**

- 1.) The example in this song is medicine and a spoonful of sugar. Give an example of an instance where two inputs that are needed in optimal amounts:
- 2.) What would happen if the inputs in question one are not selected optimally?
- 3.) An Isoquant of labor and capital (common inputs) was shown in the video. Graph an Isoquant of the inputs from the song (sugar and medicine):
